To Whom it May Concern,

Joel Wong Jun Qin (NRIC: 911118-10-5455) joined Visual Math Interactive 3rd May 2016 as a Junior Game Developer after completing his studies at KDU. I had the opportunity to work with him in several occasions. I found that he has a high capacity to focus on the task at hand. His skill in C# Unity game development is good even for a fresh graduate level.

He has a strong passion in game programming and is very well suited to write features that require algorithms to work. He is able to think, plan and execute his tasks well. He is punctual to work, humble and very teachable which are very valuable character traits.

During his time in Visual Math Interactive, he programmed an entire menu system for Zapzapmath so that users can navigate through 180 games. He is familiar in using APIs that are provided by our backend engineers. He also developed several maths games in Zapzapmath that are out in the market.

In summary, I find Joel is very disciplined and a capable Unity game programmer. He has my highest recommendation for the position that he is applying for.

Please feel free to contact me at +60-16-6785980 if you need any additional information or clarification.

Sincerely,
